## Summary

With over 3 years of professional experience as a software engineer, I have specialized in building large-scale and enterprise-level applications using various technologies such as ReactJS, VueJS, NextJS, TypeScript, and Node. My expertise extends to creating and designing RESTful APIs, server-side rendering applications, and developing in-house tools to streamline the development process.

I possess strong analytical skills to analyze requirements, devise efficient solutions, and optimize code performance. As a proactive learner, I stay updated with industry trends and continuously strive for personal growth and development. My exceptional debugging skills and ability to find innovative solutions for challenging tasks set me apart. I am goal-oriented, proficient in problem-solving, and well-versed in data structures and algorithms.

My passion lies in crafting exceptional software that tackles business challenges and makes a positive impact on people's lives. I have a proven track record of delivering viable solutions that provide an outstanding user experience. Understanding corporate objectives is a priority for me, as it informs decision-making throughout the web solution development process.

## Experience

### Frontend Developer

#### BLAC BOX

Jan 2021 - Sep 2021 (9 months)

##### Responsibilities:

- I focused on creating a seamless user interface for Blac Box, a versatile multi-API system that empowers businesses.
- I integrated key functionalities like account management, payment processing, OTP confirmation, BVN verification, and real-time access to vital bank information. I ensured businesses could leverage Blacbox's full potential effortlessly.

## Frontend Developer

### SPLEET

Nov 2021 - Feb 2023 (1 year 4 months)

#### Responsibilities:

- Enhanced product functionality and made improvements using a secure, thoroughly tested, and efficient approach.
- Collaborated extensively with the development team to transform the Figma design into user-friendly and aesthetically pleasing web pages.
- I worked on the application performance auditing and improvement, increasing page load time.

## Lead Frontend Engineer

### SPLEET

Feb 2023 - Present (1 year 3 months)

#### Responsibilities:

- Conducted code reviews for pull requests, mentored junior, and intern engineers, and led the front-end engineering team to improve engineering staff productivity.
- Developed the Spleet rental platform for landlords and tenants from scratch; this initiative played a key role in securing pre-seed funding, leading to a successful fundraising of \$2.6 million.
- Migrated the company website from a single page to a server-rendering application with SEO capability.

## Full Stack Developer

### TRUHR

Jan 2024 - Present

#### Responsibilities:

- Collaborate with stakeholders, including recruiters, HR professionals, and managers, to comprehend their needs and transform them into precise technical specifications.
- Design the overall architecture of the recruitment platform, including databases,

server infrastructure, and user interface components. Consider scalability, security, and performance requirements.

- Write clean, efficient, and maintainable code to implement the features and functionality of the recruitment platform.
- Implement security best practices to protect sensitive data, including candidate information, client details, and job listings. This involved encryption, access controls, and secure authentication mechanisms.
- Enhance the platform's performance to guarantee quick response times and effective resource utilization. This required implementing caching techniques and optimizing the code.

## Education

**Ekiti State University**

Bachelor of Education - B.Ed

2011 - 2016

## Skills

React.js • Next.js • Vue.js • Nuxt.js • TypeScript • Node.js

## Honors & Awards

 **Best in Frontend Engineer - Spleet**

Feb 2023

Best Frontend Engineer at Spleet Africa.
