## Summary

I'm a software engineer with over 3 years of professional experience building large-scale and enterprise-level applications using technologies like ReactJS, VueJS, NextJS, TypeScript, and Node, but not limited to these. Experience includes building and designing RESTful APIs, server-side rendering applications, and developing high-quality in-house tools to ease development.

I have a strong ability to analyse requirements, architect efficient solutions, and optimise code performance.

I'm a proactive learner who stays updated with industry trends. I am very passionate about personal growth, development, and continuous learning. I have exceptional debugging skills and a knack for developing creative solutions to daunting tasks. I'm goal-oriented and an avid problem solver, proficient in data structures and algorithms.

I'm passionate about building great software that solves business problems and that affects lives. I have a proven record of developing viable solutions that deliver a great user experience. I like to understand corporate goals in order to make decisions while developing web solutions.

## Experience

### Frontend Developer

BLAC BOX

Jan 2021 - Sep 2021 (9 months)

Responsibilities:

I focused on creating a seamless user interface for Blacbox, a versatile multi-API system that empowers businesses.

I integrated key functionalities like account management, payment processing, OTP confirmation, BVN verification, and real-time access to vital bank information. I ensured businesses could leverage Blacbox's full potential effortlessly.

### Frontend Developer

Spleet

Nov 2021 - Feb 2023 (1 year 4 months)

Responsibilities:

Developed features and improvements to the product in a secure, well-tested, and performant way

Collaborated closely with the development team to translate the figma design into intuitive and visually appealing web pages.

I worked on the application performance auditing and improvement, increasing page load time.

### Lead Frontend Engineer

Spleet

Feb 2023 - Present (1 year)

#### Responsibilities:

Conducted code reviews for pull requests, mentored junior and intern engineers, and led the front-end engineering team to improve engineering staff productivity;

Built the Spleet rental solution for landlords and tenants from the ground up; this project helped in the pre-seed funding round, contributing to the successful raising of \$2.6 million;

Migrated the company website from a single page to a server-rendering application with SEO capability.

## Education
