A web application developer with over 2 years of experience, who is strong-focused, self-motivated, and devoted and who has a keen eye for aesthetics and design. I have a very solid foundation in JavaScript (ES6), and I'm also skilled with contemporary frameworks and libraries, including but not limited to React, Vue, and Nuxt. I have experience using Node Express JS and MongoDB to build RESTful APIs. I'm excited to offer my diverse set of skills and expertise to the organization to meet and surpass their needs.

Skills

- Skilled in writing clean, efficient, and reusable code.
- Strong background in JavaScript (ECMAScript).
- Expertise utilizing Node Express JS and MongoDB to build a RESTful API while adhering to best practices.
- Proficient with frameworks and libraries like React, Vue, Nuxt.
- Dynamic, teachable, and always open to new learning environment.

Experience

NOVEMBER 2021 – TILL DATE

FULL - TIME

Software Engineer / Spleet Africa

- Conduct code reviews for pull requests, mentor junior and intern engineers, and lead the front-end engineering team to improve engineering staff productivity.
- Worked on performance auditing and improvement, increasing page load time by more than 40%.
- Created pixel-perfect interactive web applications that adhere to design specifications.
- Converted the UI designs to a mobile responsive web application.

MARCH – SEPTEMBER 2021

CONTRACT

Software Engineer / CitiTasker Technology

- Maintenance brand consistency in the design
- Optimize application performance for maximum speed
- Developed various user-friendly interactive web application features.

Personal Projects

SEPTEMBER – PRESENT

Software Engineer / e-Commerce

- Built API following RESTful standards to allow users to submit information and storing the data received to MongoDB.
- Utilize the JSON Web Token to create a strong and secure authentication system.
- Created the back-end server with Node Express JS.
- Break the entire UI into chunks of components for reusability.
- Used Redux Toolkit for state management.

Education

APRIL 2020 – JULY 2020

The Complete Web Developer Course / Udemy (Online)

- Learned advance JavaScript and JQuery
- Learned MySql Database
- Learned PHP as a server-side language

Activities

I have a strong love for learning, and I'm willing to pick up new skills and learn new technologies to develop my profession. I first volunteered to assist with the engineering team at my present job before I fully joined the team. I want to offer my knowledge and abilities to the creation and accomplishment of the company's objectives. I enjoy hanging out, reading, listening to music, and watching movies outside of work.
