An experienced Software Engineer with 2+ years of experience, skilled in React.js, Vue.js, Node.js and TypeScript. Experience includes building and designing RESTful API, Server-side rendering applications, developing high-quality in-house tools to ease development.

I'm result oriented and passionate about developing innovative solutions to business problems, well-versed in Agile workflow and have a proven record of developing viable solutions that deliver great user experience. I'm positive and well-organized, with excellent written and verbal communication abilities, strong interpersonal skills as well as the ability to operate with little or no supervision required. Multitasking prodigy with the capacity to understand corporate goals in order to make decisions while developing web solutions. I am very passionate and hardworking, with the ability to meet deadlines. I can handle your React.js and Vue.js projects professionally.

Skills

- Skilled in writing clean, efficient, and reusable code.
- Strong background in JavaScript (ECMAScript).
- Expertise utilizing Node Express JS and MongoDB to build a RESTful API while adhering to best practices.
- Proficient with frameworks and libraries like React, Vue, Nuxt and Next.
- Dynamic, teachable, and always open to new learning environments.

Experience

NOVEMBER 2021 – TILL DATE
FULL - TIME
Software Engineer / Spleet Africa

- Conduct code reviews for pull requests, mentor junior and intern engineers, and lead the front-end engineering team to improve engineering staff productivity.
- Worked on performance auditing and improvement, increasing page load time.
- Created pixel-perfect interactive web applications that adhere to design specifications.
- Converted the UI designs to a mobile responsive web application.

MARCH – SEPTEMBER 2021
CONTRACT
Software Engineer / CitiTasker Technology

- Maintenance brand consistency in the design
- Optimize application performance for maximum speed
- Developed various user-friendly interactive web application features.

Personal Projects

SEPTEMBER – PRESENT
Software Engineer / e-Commerce

- Built API following RESTful standards to allow users to submit information and storing the data received to MongoDB.
- Utilize the JSON Web Token to create a strong and secure authentication system.
- Created the back-end server with Node Express JS.
- Break the entire UI into chunks of components for reusability.
- Used Redux Toolkit for state management.

Education

APRIL 2020 – JULY 2020
The Complete Web Developer Course / Udemy (Online)

- Learned advance JavaScript and JQuery
- Learned MySql Database
- Learned PHP as a server-side language
